

Alain Thébault

Inventor of L'Hydroptère & President of Seabubbles

"The Jet – The World's First Hydrogen-Powered Flying Boat"

Alain Thébault, is the creator & designer of 3 iconic flying boats: the world sailing speed record holder l'Hydroptere, a proof of concept called Seabubbles and for 2022, a new game changer "THE JET ZeroEmission".

TOPICS:

- Zero Wave, Zero Noise, Zero Emission
- Clean Energy
- Sustainability
- Innovation
- Technological Advancements

LANGUAGES:

He presents in English and French.

IN DETAIL:

L'hydroptère was launched in 1995 and reached 35 knots the same year. Since 2005, with the support of Swiss banker, Lombard Odier Darier Hentsch & Cie in Geneva, Alain modified his yacht for an attempt to reach the speed of 50 knots and more. He co-founded SeaBubbles a company dedicated to designing and building the latest generation craft with the motto "Zero Wave, Zero Noise, Zero Emission" thanks to the combination of a hybrid hydrogen-electric propulsion system and retractable foils. The SeaBubble H2 offers a sustainable mobility alternative in waterways as well as marine zones and protected areas.

WHAT HE OFFERS YOU:

Alain Thébault has both breadth and depth with his experiences in technology, innovation and sustainability. He speaks about his leading-edge developments across a wide spectrum and variety of topics.

HOW HE PRESENTS:

Alain is a dynamic speaker, his presentations captivate audiences across the globe. A true professional, Alain prepares meticulously for all events and engages audiences with his thorough subject knowledge.
